

iso-paw

Introduction

Vertere Iso-paw is designed & manufactured to enhance the performance of your DG-1 record player and/or Phono-1 cartridge amplifier and provide years of musical enjoyment.

Utilising an Acetal support with Felt underside for coupling with the support surface and Sorbothane dome top for decoupling and supporting the DG-1 record player or the Phono-1 cartridge preamplifier.

The 3-Pack version is suitable for the DG-1 record player.

Iso-paw enhances the performance of your DG-1 and provides increased immunity from unwanted external vibrations.

The Iso-paws are easily installed under each foot and immediately provide better isolation and enhanced bottom end, better focused imaging and soundstage and quieter background resulting in increased dynamic range.

3 Pack | DG-1

The 4-Pack version is suitable for the Phono-1 MM/MC phono cartridge preamplifier.

Iso-paw enhances the performance of your Phono-1 providing similar increased immunity from unwanted external vibrations. Internal circuits are affected by microphony - especially the equalisation and amplifier circuits for the delicate phono cartridge signal.

The Iso-paws are easily installed under each foot and the results are very similar to the improvements on the DG-1.

4 Pack | Phono-1
