Introduction

Vertere Magneto Moving Magnet Phono Cartridge is designed & manufactured to exacting standards to provide you with years of musical enjoyment.

The Dual Magnet design replicates the structure of the cutter head.

A 'V' form two magnet design mimics the Left & Right channel sides of the record groove. This feature, with an added perm-alloy centre shield plate, provides a higher frequency response and exceptional channel separation - better than 40dB.

The Magneto utilises a finely finished Elliptical stylus to ensure outstanding tracking ability and super quiet tracing of the record groove. Use of laminated Para-toroidal coils with 'V' geometry of the magnets also gives rise to higher efficiency in generating the output signal.

An absolutely gem of a cartridge for any starter record playing system.

The Magneto is factory fitted to our own DG-1 'Plug & Play' Dynamic Groove record player package.

Specifications

Generator Type	_____	Moving Magnet
Output	_____	4.5mV (@ 1kHz, 5cm/sec.)
Frequency Response	_____	20Hz - 23kHz
Coil Resistance (per Channel)	_____	800Ω
Recommended Tracking Weight	_____	2.0g
Recommended Load	_____	47,000 Ω
		100pF - 200pF
Cantilever	_____	Aluminium
Stylus	_____	Bonded Shank
Diamond Profile	_____	Elliptical
Weight	_____	6.58g
